

# Seeding Success: Tools, Technology and Techniques for a Successful Extension Natural Resources Career!

A Summer 2024 course brought to you by the ANREP Professional and Leadership Development Committee

Join a cohort of Extension professionals to enhance your Extension Career. To complete the course you will:

- Complete 8 modules asynchronously
- Join three live one-hour zoom meetings to discuss module topics

Seeding Success is a unique online course that supports a successful Extension career. The 8-module course combines presentations and recorded interviews by experienced Extension natural resource professionals with readings to cover a variety of professional development topics, including networking and mentorship, audience and needs assessment, program development and delivery, program evaluation, scholarship, funding, and more. *A certificate of participation is awarded with completion of all modules.*
